**MOBILITY SCHEME**  
**(Addressing relocation issue of Women Scientists)**

In the year 2014, Department has restructured all the women specific programmes under one umbrella known as “KIRAN” (Knowledge Involvement in Research Advancement through Nurturing). KIRAN is addressing various issues related with women scientists (e.g. unemployment, relocation etc.) and aimed to provide opportunities in research (WOS-A), technology development/demonstration (WOS-B), and self-employment (WOS-C) etc. KIRAN is also actively involved in taking proactive measures, under the name CURIE (Consolidation of University Research for Innovation and Excellence in Women Universities) to develop state-of-the-art infrastructure in women universities in order to attract, train and retain promising girls students in S&T domain.

In continuation of this, another landmark programme, named as, “Mobility Scheme” has been just launched under KIRAN which will address relocation issue of women scientists working in regular position in Government Organizations. The Mobility Scheme is aimed to provide an opportunity to women scientists who are facing difficulties in their present job due to relocation (marriage, transfer of husband to any other location within the country, attending ailing parents, and accompanying children studying in different city) and will act as filler while searching other career option at new place. The initiative intends to provide a harmonious environment during early phases of women scientists where they would like to stay active in research in addition to attending and fulfilling other responsibilities in the domestic front. It offers a contractual research award to women scientists and enables them for independent research.

***Who can apply:***

1. Scientists/academicians working at permanent position in any Government Institution/R&D Lab/University and willing to resign from their permanent position or take a long leave to avail the fellowship and after completion of the tenure return back to the parent organization.
