PART 2 - RESEARCH PLAN (MAX. 20 PAGES)

1 Abstract (max. 8000 characters)

Briefly describe the objectives, the research plan, and expected results of the proposed research project. Please use non-technical language.

For application in Switzerland: *This summary should be an exact copy of the one you have written in the mySNF data container “Basic data II”.*

2 Background (max. 2 pages)

Briefly describe the current state of the art in the proposed area of research and outline previous work in this field. Describe why the proposed research is needed and how it contributes to your field of research.

For projects involving industrial partners, please state if there should be potential for intellectual property generation, and the market impact of the project.

3 Objectives (about 1/2 page)

Describe in detail the objectives of the proposed project.

4 Detailed research plan including methodology (max. 10 pages)

Explain in detail your approach and methodology to conduct the proposed research and to obtain the stated objectives.

5 Partnership aspects

Outline the previous work and past performance of all applicants in the proposed area of research. Briefly describe their experiences and strengths and show their complementarities.

6 List of milestones

Outline major milestones of your project on a time-scale of months and list the activities that will be required in order to achieve the milestone.

Milestone	Associated activity	Expected date (measured in months from the project start date)	Responsible project partner

Insert additional rows into the table if required.

6 Expected results and dissemination plan

Describe in detail the project outcomes you envisage. Explain how you will share these findings with stakeholders and the community. Address potential for knowledge transfer to industry (if applicable).

7 Ethical, safety and regulatory issues

Does your proposed work raise ethical, safety or regulatory issues? If yes, how will you deal with it? Clearly indicate!

8 Research requiring authorizations or notifications

Indicate whether the proposed research include:

	YES	NO
Humans, human tissue samples or individual medical data		
Vertebrates, decapods or cephalopods		
Pathogens or genetically modified organisms		
Human embryonic stem cells		

Please note that research on humans, human embryonic stem cells, vertebrates, decapods, cephalopods, pathogens and genetically modified organisms needs authorization and/or notification in Switzerland. For more information please see:
